Job Description

We are currently seeking **Civil Project Engineer/Utility Design Engineer** to join our Chester, VA office location. All experience levels welcome, we will train and develop your skills. This individual will primarily work with the utility design engineering department but will interact with the survey department along with the land rights department.

Essential Duties and Responsibilities of a successful candidate include but are not limited to:

- Review plans, identify conflicts with proposed work, verify with recorded plans.
- Design portions of a project using relevant office software, including microstation, CADD and/or ArcGIS.
- Assists in the preparation of land entitlement and permitting documents.
- Complete calculations using engineering formulas and skills and/or utilizes computers in order to solve problems.
- Complete field observation, inspection and data collection duties as directed by senior engineer.
- Communicate with client staff as directed by senior engineer.

Skills/Requirements of a successful candidate include but are not limited to:

- A bachelors in civil engineering, or closely related degree.
- EIT preferred.
- Working knowledge of CADD, and/or civil 3D software. (Microstation preferred)
- Must be legally eligible to work in the Unites States without sponsorship now and in the future.

Abilities:

- Strong civil engineering background
- Excellent verbal, written and interpersonal communication skills
- Self-motivated
- Attention to detail
- Ability to think critically
- Strong computer skills
- Excel in working in a team environment

The requirements listed above are representative of the knowledge, skills and/or abilities required. Reasonable accommodations may be made to enable individuals with disabilities to perform the essential functions.
